

National Security Briefing – Sensitive Information

Deconstructing the 9/11 Pentagon Attack

With Citizen Investigation Team and Pilots for 9/11 Truth
Sponsored by The Wisdom Fund — TWF.org

July 11, 2009
10:00 a.m. to 2:45 p.m.

NRECA Conference Center
4301 Wilson Blvd., Arlington, VA

With the surge in Afghanistan, 9/11 is cited daily to justify the U.S. presence in Afganistan. This timely presentation, with rare photos and videos, challenges and undermines the official account of what happened on that tragic September 11, 2001. It will feature a detailed deconstruction of the Flight Data Recorder information — allegedly from the black box of Flight 77 — released by the National Transportation Safety Board in 2006. A simulation of the official flight path based on this data, with carefully constructed topography and obstacles, will be compared to physical aircraft limitations by a certified pilot. The data and the physical damage will also be compared with first-hand videorecorded, witness accounts from Pentagon police, Arlington Cemetery employees, and Arlington citizens.

Presenters

Shelton F. Lankford: Lt. Col. USMC (ret.), fighter pilot with 300+ combat missions and 10,000+ hours flight time. Awarded the Distinguished Flying Cross, and 32 Air Medals.
